### What is iceCOOL.co?

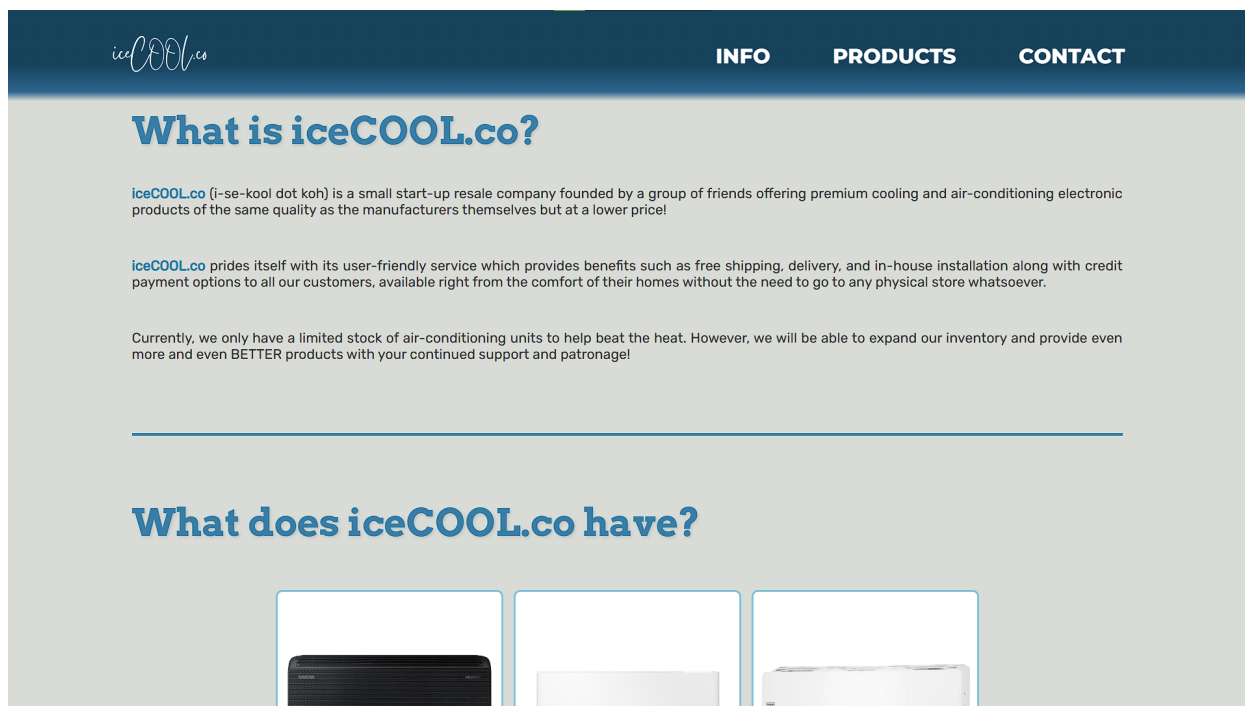

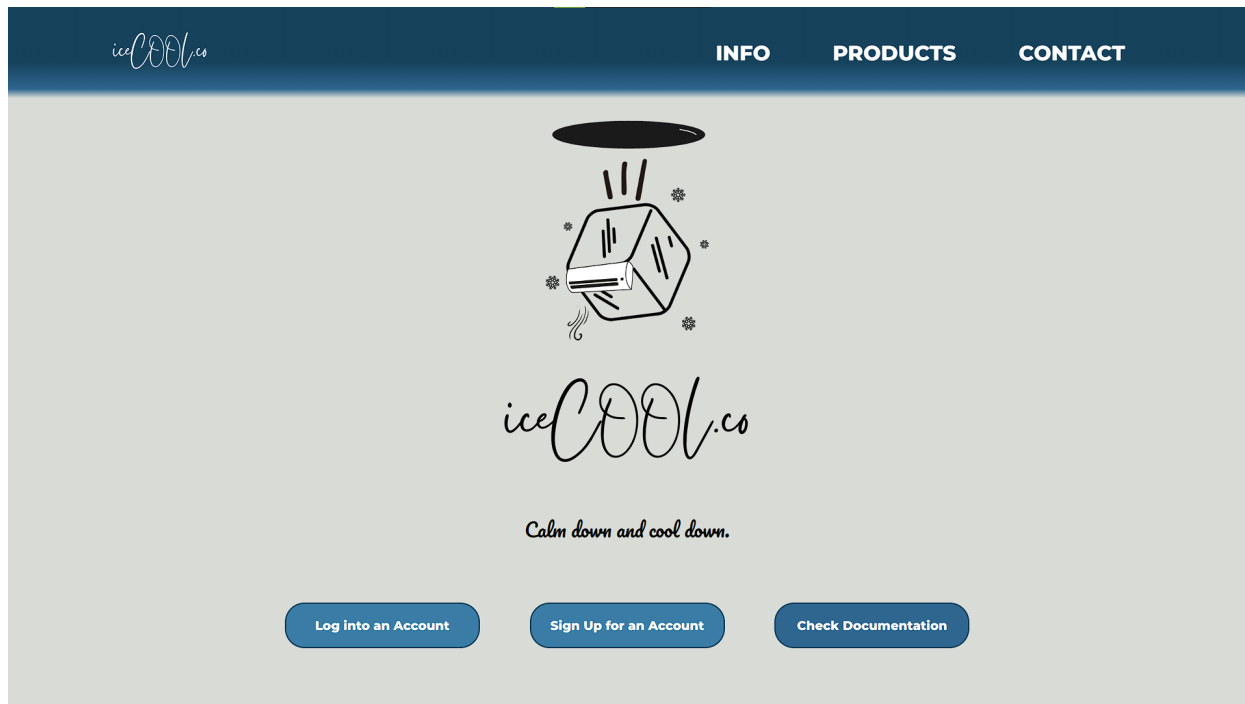

- It is a website for a start-up resale company that allows users to purchase cooling products such as air conditioning units (acquired directly from the manufacturers in bulk) online and have it delivered to their homes without having to pick it up themselves from the store.
  - Basically: wholesale but not really.

### How does iceCOOL.co work?

- You must have registered for an account to purchase products.
  - You can register for an account from within the site.
- After registering/logging in, you can browse and manage your pending orders on your **Profile** page and then shop for more products at the **Shop** page.
- Selecting an object you wish to buy at the Shop page will bring you to the **Checkout** page, letting you confirm your payment method and installation option.
- After confirming your order, you will be brought to the **Success** page where you can request an invoice detailing your order.
  - You can also choose to Continue Shopping or Log Out.
